

Ethnographic Research Map: Irregularized Migration at the Periphery of EU

Marijana Hameršak, Bojan Mucko, Mojca Piškor, Iva Pleše

The map points to the locations visited or identified by the researchers involved in the project *ERIM – European Regime of Irregularized Migration at the Periphery of the European Union: From Ethnography to Keywords* (2020–2024). Evoking some familiar elements of ethnological cartography, the map presents sites of racialized social segregation and the production of desirable and undesirable existences. The map was initially created and displayed as part of the exhibition *Travelers* of the Ethnographic Museum in Zagreb.
